## You must be so fast by now!

Three tests this week - read the notes on the left first.

A bit of extra help...
Now that you know how to find $10 \%$, finding $20 \%$, $30 \%$, $40 \%$ etc is easy. For example:
$30 \%$ is 3 lots of $10 \%$.

## Look at this:

Find $30 \%$ and $70 \%$ of $£ 9.00$
$10 \%$ is $\frac{1}{10}$ of $£ 9.00=90$ p so $30 \%$ is $3 \times 90 p=£ 2.70$ and $70 \%$ is $7 \times 90 p=£ 6.30$

For $20 \% .40 \%, 60 \%$ and $80 \%$ you can use another method:
$20 \%=\frac{20}{100}=\frac{2}{10}=\frac{1}{5}$
$40 \%=\frac{40}{100}=\frac{4}{10}=\frac{2}{5}$
$60 \%=\frac{60}{100}=\frac{6}{10}=\frac{3}{5}$
$80 \%=\frac{80}{100}=\frac{8}{10}=\frac{4}{5}$
For example, to find $60 \%$ of $£ 15.00$ you could use:

Method 1:
$10 \%$ of $£ 15.00$ is $£ 1.50$ so $60 \%$ is $6 \times £ 1.50=£ 9.00$
or Method 2:
$60 \%$ is the same as $\frac{3}{5}$
$\frac{1}{5}$ of $£ 15.00$ is $£ 3.00$
so $\frac{3}{5}$ is $3 \times £ 3.00=£ 9.00$

Test 15

| 1. | forty |
| :---: | :---: |
| 2. | find 30\% |
| 3. | double it |
| 4. | +1 |
| 5. | $\sqrt{n}$ |
| 6. | times by 7 |
| 7. | double it |
| 8. | 20\% of this |
| 9. | find 50\% |
| 10. | $n^{2}$ |
|  | Answer: $49$ |

Test 16

| 1. | £20 |
| :---: | :---: |
| 2. | 90\% of this |
| 3. | add £16 |
| 4. | find 50\% |
| 5. | deduct £10 |
| 6. | 40\% of this |
| 7. | minus $£ 2$ |
| 8. | find 25\% |
| 9. | $\times 5$ |
| 10. | Find 70\% |
|  | Answer: $70 P$ |

Test 17

| 1. | ten |
| :---: | :---: |
| 2. | $\mathrm{n}^{2}$ |
| 3. | +21 |
| 4. | $\sqrt{n}$ |
| 5. | times by 5 |
| 6. | remove 5 |
| 7. | find 80\% |
| 8. | 75\% of this |
| 9. | find 50\% |
| 10. | X 4 |
|  | Answer: $60$ |
