The Complete GL 11+ Programme – Dorset - Preview

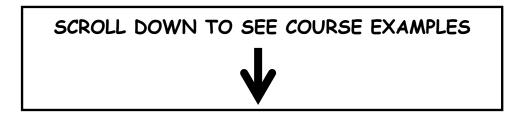

This preview is designed to show you in some depth the work we'll go through in this course. It covers all elements of the GL 11 Plus exam in the Dorset area.

Who is this course right for?

- The course is designed to fully prepare pupils for the GL 11 Plus exam in the Dorset area and should be central to the work of any child preparing at home.
- It is also very useful for any child using a tutor or going to a tuition centre. Many Tutors use our courses as the basis of their work, especially for setting homework. If your tutor doesn't give homework then this course will fill the gap.
- The programme is perfect if your child has 30 40+ weeks to go until the exam. It is delivered in 40 parts. Ideally a week would be spent on each part, however the programme could be completed more intensively in 30 weeks, or in a more relaxed way over longer than 40 weeks.

Why is the course so successful?

- The course is specifically tailored for 11 Plus exams in the Dorset area. It therefore thoroughly prepares pupils for the subjects covered in Dorset, including English, Verbal Reasoning (with a focus on vocabulary) and Maths.
- The course is fully planned and structured, which makes life much easier for parents than using books alone.
- Time will not be wasted revising subjects that are not tested in Dorset. The course is fully relevant to the GL 11 Plus exam in Dorset.
- Revision and tests are gradually introduced so that children build their skills and confidence as they go.
- While the course is regularly updated, the core of it has been used for many years with proven success.

This course will help you to develop all the skills you need for the exam. If you do a little work each day and work consistently you will give yourself the best chance.

26. <u>Working Accurately</u>

- Accuracy table. Children who can carry out times table based maths quickly and accurately will be well placed to succeed. This test indicates how good your skills are. It's tough, but remember whatever your result, you can always improve. This test will be repeated three times.
- **Spot the mistakes**. The more alert children are to mistakes, the fewer they will make.
- 27. <u>Mental Maths Technique Development</u>. These sheets focus on giving children some tips for working quickly with mental calculations.

- **28.** <u>Mental Maths.</u> These questions are reasonably straightforward and children should be aiming for full marks, especially on those questions they feel they should know.
- **29.** <u>Sudoku Fractions and Decimals.</u> A fun table to fill out. Can you get to the right answer?
- **30.** <u>Shapes Revision</u>. It's important to know your shapes well. Read this carefully, cover up the words and see if you can remember the descriptions. Get someone to read the descriptions out loud and see if you can name the shapes.

- Please sign below when you have completed everything.
- Your helper may have to test you on some things.

which were so thick that they were matted together. Mary Lennox knew they were roses because she had seen a great many roses in India. All the ground was covered with grass of a wintry brown and out of it grew clumps of bushes which were surely rosebushes if they were alive. There were numbers of standard roses which had so spread their branches that they were like little trees. There were other trees

in the garden, and one loveliest was that clin tendrils which made each other or at a farmade lovely bridges everything, walls, and

Mary had thought it must be different from other gardens which had not been left all by themselves so long; and indeed it was different from any other place she had ever seen in her life.

"How still it is!" she whispered. "How still!"

Using Colons

- A colon is a punctuation mark that we can use to introduce the items in a list.
- For example: 'To bake a cake you will need: butter, flour, eggs and milk.'
- We use commas to **separate** each **item** in the list. Then we use the connective **'and'** before the last item.
- You will often see colons used in **ingredient** lists and sometimes in **instruction** manuals.

Exercise 1:

The colons in the sentences below have been used in the wrong places. Re-write the sentences and put the colons in the correct place. An example has been given.

- 1. The countries George has been to: include France, Italy, Spain, Ireland and Wales. The countries George has been to include: France, Italy, Spain, Ireland and Wales.

We also work on punctuation and grammar throughout the course as GL tests often have a section where children will need to correct mistakes.

Exercise 2:

Write a list using a colon to describe the things below:

- 2. Your favourite subjects at school
- 3. What you need to make a cup of tea

Edgar Evans was born on March 7th 1876, near Rhossili in Wales. At fifteen he joined the Royal Navy. A few years later, while serving on HMS Majestic, he met a young naval lieutenant, Robert Falcon Scott. It was a fateful meeting.

In 1911, Captain Scott, by now a famous polar explorer, wanted to be the first man to reach the South Pole. The Norwegian, Roald Amundsen, had the

same intention. Scott sailed south with a large team, and after weeks of training and setting up food dumps along the intended route, he selected his team to make the final race to the pole. He chose his four best men - Petty Officer Evans, Lt. Henry Bowers, Capt. Titus Oates, and Dr. Edward Wilson. Scott described Evans as a 'giant worker'. "He is responsible for the equipment - every sledge, every sledge-fitting, the tents, sleeping-bags, harnesses, everything. He is a big man, strong, resourceful and always cheerful so he boosts our morale."

Eleven weeks after setting off from base camp, the five men reached the South Pole on 17 January 1912. They had man-hauled their sledge, with their food, tents and equipment on board, across hundreds of miles of rutted ice and snow. Imagine their despair when they saw the

companions, walked out into the freezing night never to be seen again. The party was now three and there was no food left. The next food depot was only eleven miles away but the weather was closing in. Trapped in their tent by a ferocious blizzard, with temperatures plummeting, they could make no further progress.

The bodies of Scott and his companions were discovered by a search party on 12 November 1912 and his diary and their records retrieved. Their final camp became their tomb; a high cairn of snow was erected over it, topped by a roughly fashioned cross. In January 1913, before Terra Nova left for home, a large wooden cross was made by the ship's carpenters, inscribed with the names of the lost party and Tennyson's line from his poem Ulysses: "To strive, to seek, to find, and not to yield". It was erected as a permanent memorial on Observation Hill, overlooking Hut Point.

A Plaque in the little Norman church at Rhossili reads: "To the Glory of God and in memory of Edgar Evans 1st Class Petty Officer, R.N., and a native of this Parish, who perished on the 17 February 1912, when returning from the South Pole with the Southern Party of the British Antarctic Expedition under the command of Captain Robert Falcon Scott.

THREE MEN IN A BOAT – Jerome K. Jerome

This is a humorous novel that follows the adventures of three friends embarking on a boat trip along the River Thames. The extract below comes from the beginning of the story where the two of the three characters are starting out on their trip and getting ready to camp out on their first night. The narrator imagines past camping trips spent by the river before thinking about the trip he is on, where it is raining. The narrator is one of the three men; his friends are called Harris and George.

cooked and eaten. Then the big pipes are filled and lighted, and the pleasant chat goes round in musical undertone; while, in the pauses of our talk, the river, playing round the boat, prattles strange old tales and secrets, sings low the old child's song that it has sung so many thousand years—will sing so many thousand years to come, before its voice grows harsh and old—a song that we, who have learnt to love its changing face, who have so often nestled on its yielding bosom, think, somehow, we understand, though we could not tell you in mere words the story that we listen to.

And we sit there, by its margin, while the moon, who loves it too, stoops down to kiss it with a sister's kiss, and throws her silver arms around it clingingly; and we watch it as it flows, ever singing, ever whispering, out to meet its king, the sea-till our voices die away in silence, and the pipes go out-till we, common-place, everyday young men enough, feel strangely full of thoughts, half sad, half sweet, and do not care or want to speak-till we laugh, and, rising, knock the ashes from our burnt-out pipes, and say "Good-night," and, lulled by the lapping water and the rustling trees, we fall asleep beneath the great, still stars, and dream that the world is young again—young and sweet as she used to be ere the centuries of fret and care had furrowed her fair face, ere her children's sins and follies had made old her loving heart-sweet as she was in those bygone days when, a newmade mother, she nursed us, her children, upon her own deep breast-ere the wiles of painted civilization had lured us away from her fond arms, and the poisoned sneers of artificiality had made us ashamed of the simple life we led with her, and the simple, stately home where mankind was born so many thousands years ago.

What is the relationship between C and t? The answer is forward 3 places. We then apply the same to the second section.

As QW is to __? From Q, 3 forwards is T so the first letter of our answer is T.

3) Then we do the same with the second letter.

CG is to FM as QW is to T_?

The relationship between G and M is forward 6, so the relationship between W and the answer is forward six. W + 6 = C

4) With multiple choice questions if only one answer option started with a T then that would be the correct one. (realising this may have saved time)

- Watch out for the changes to $+/\div/-/x$
- This test will be repeated five times, where mistakes are made it will be an indication that further times tables work and attention to detail is necessary.

A rectangular garden comprises a rectangular flowerbed surrounded on three of its sides by a lawn.

Answer the following questions which relate to this diagram.

a) How long is the garden?

 f) Find the cost of re-sowing the lawn if grass seed costs £1.86 for each square metre of lawn. Answer: _____

The BODMAS Rule

The rule for the order in which you conduct calculations is: **BODMAS**

This means:

Brackets Orders Division Multiplication Addition Subtraction.

In other words:

1. You must work out the sum in the Bracket first and then complete any Orders (this also means indices, powers, or roots e.g. 3²).

2. Next you must work out any Divison or Multiplication.

3. Finally complete any Addition or Subtraction required.

Remember - if a number appears immediately before a bracket it means you must Multiply (the result of the sum in the bracket) by that figure, so: 5(3.1 + 1.9) means $5 \times (3.1 + 1.9) = 5 \times 5 = 25$

Here is an example of the **BODMAS** rule in action:

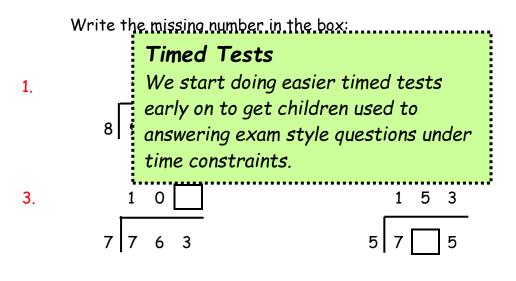

6(1.2 + 6	
= 6 x 2	BODMAS
= 12 - 3	This is another example of the focus we place
= 9 🗸	on individual topic knowledge. For some
	children topics will be entirely new, for others
	it will act as useful re-enforcement.
Now look at th	
÷	

6(2.36 + 5.62) =	Do the Bracket sum first - 2.36 + 5.62 = 7.98
6 × 7.98 = 47.88 ✓	Then Multiply

TIMED TEST NUMBER 1

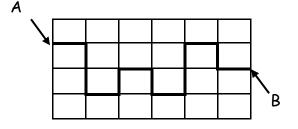

You have 30 minutes to complete this test.

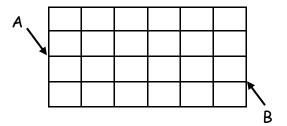

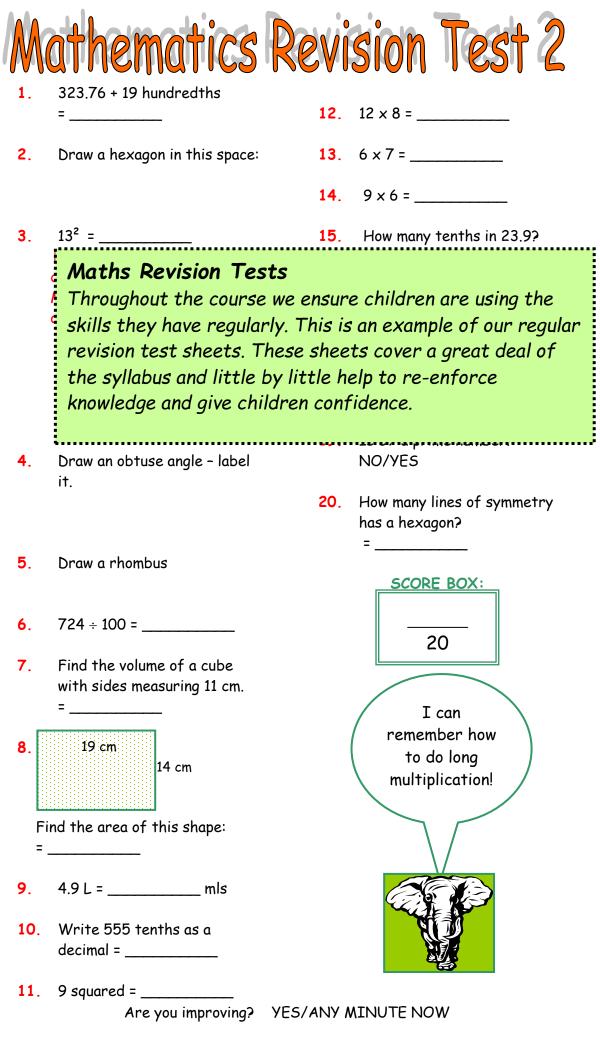

This calculation has the same number missing from each box. What is it?

The thick line from A to B divides the area of this grid into two halves: Divide the area of this grid into two halves.
 Start at A and go along the lines, finishing at B.

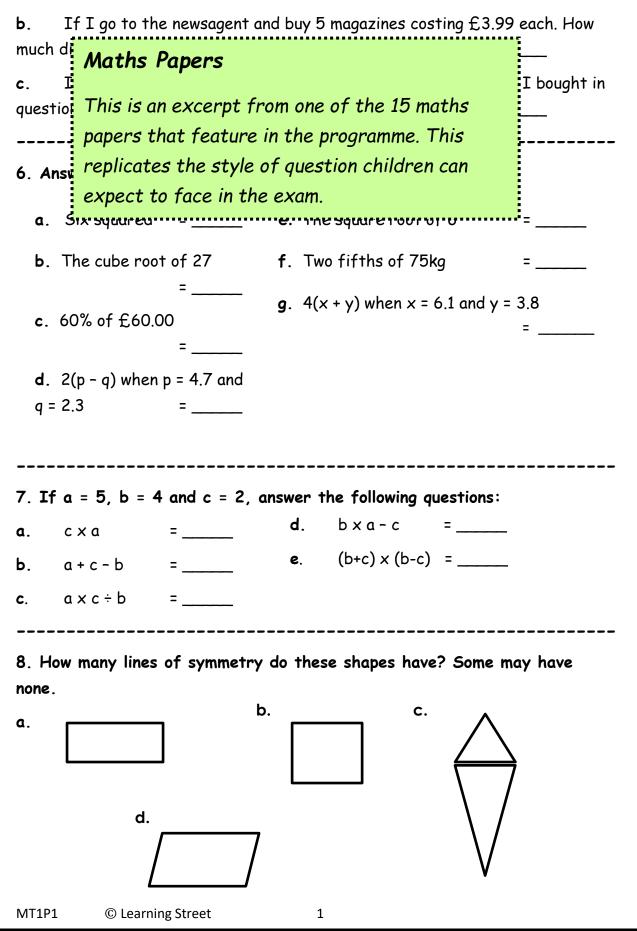

5. Complete the following money problems.

a. A single bus fare to work costs £1.25. How much have I spent altogether on bus fares by the time I have returned home?

Spot the Mistakes

(1) 5 thousands and 4 units

(The 5 is in the thousands column. Sometimes children make the mistake of seeing the 4 and taking it out leaving the 500)

(4) Answers should be a)100 and b)200

(There are 1000 metres in a km not 100)

(5) £3.10

The child may have leapt to the answer seeing the 4 and the 6 and forgetting all about the two fives

6 145

Not reading the question which is effectively 'find the sum of'.

The question expects children to multiply 29 \times 5 (they could multiply 30 \times 10 (300) divide by 2 (150) and take away 5 (145) as a quick way through this)

(12) 7 x 6 = 42 not 52

So 42 - 12 = 30
